

1st Citiverse Assembly
Global Initiative on Virtual Worlds and AI – Discovering the Citiverse
Keynote – From Smart City to Citiverse: Valencia Leading by Example

3 November 2025
Valencia, Spain and online

Ernesto Faubel-Cubells

Head of Smart City & Data Management Department
Valencia, Spain

Hosted by:

Co-organized by:

From Smart City to Citiverse: Valencia Leading by Example

How Valencia is transforming into a connected, inclusive and sustainable urban ecosystem

Hosted by:

Co-organized by:

Agenda

- Valencia's Key facts
- Valencia's Smart City foundations
- Key pillars of the transition
- Data & platforms
- Mobility & infrastructure
- Smart buildings & citizen services
- Tourism, inclusion & sustainability
- From Smart City to Citiverse
- Challenges & lessons learned
- Vision ahead & conclusions

Hosted by:

Co-organized by:

Valencia – Key Facts

- Valencia, located on Spain’s eastern coast along the Mediterranean Sea, is home to around 800,000 residents, with over 1.5 million in its metropolitan area.
- Founded by the Romans in 138 BC, it combines rich heritage with innovation and modern development. The city is an economic hub for tourism, technology, and logistics, hosting one of the Mediterranean’s leading ports,
- Culturally, the city is renowned for *Las Fallas*, a UNESCO-recognized Intangible Cultural Heritage festival that symbolizes creativity and community spirit. Valencia represents a balance between tradition and progress, making it a strategic and inspiring location within the Mediterranean region.

Hosted by:

Co-organized by:

València – Green & Digital Transitions

- Both should be carried out in parallel
- Climate Mission 2030
- European Green Capital 2024

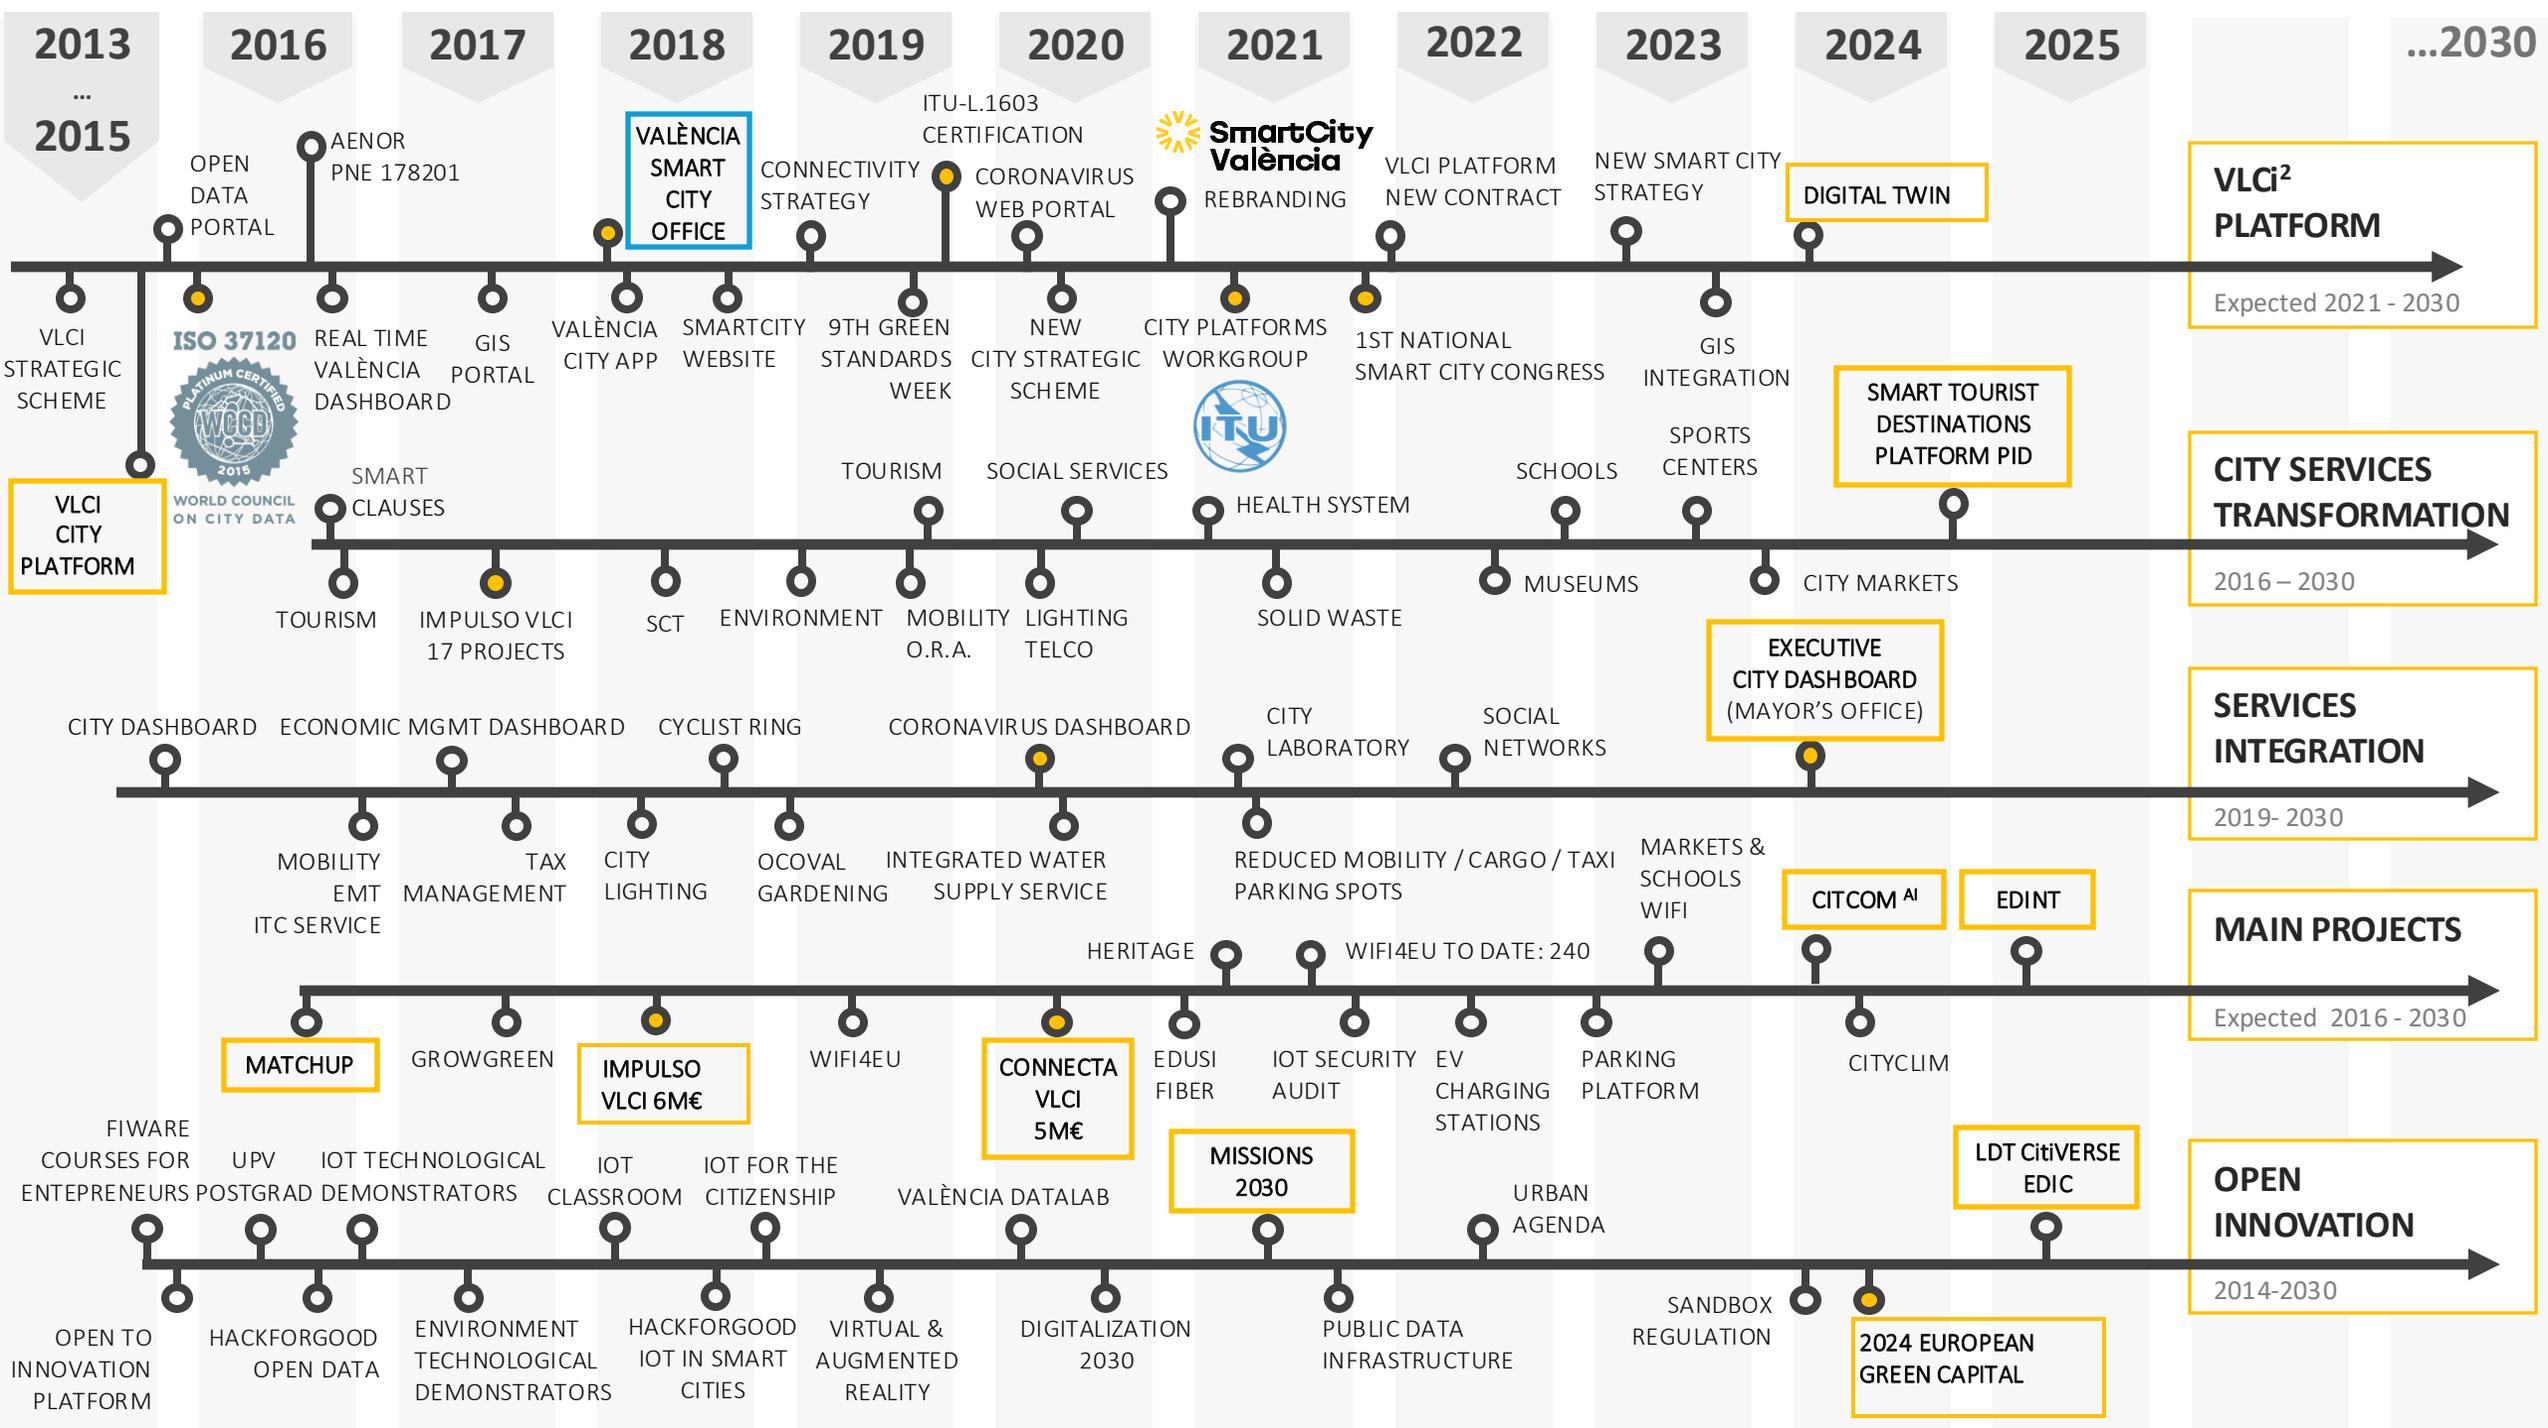

Hosted by:

Co-organized by:

Valencia's Smart City foundations

Data-Driven City Management

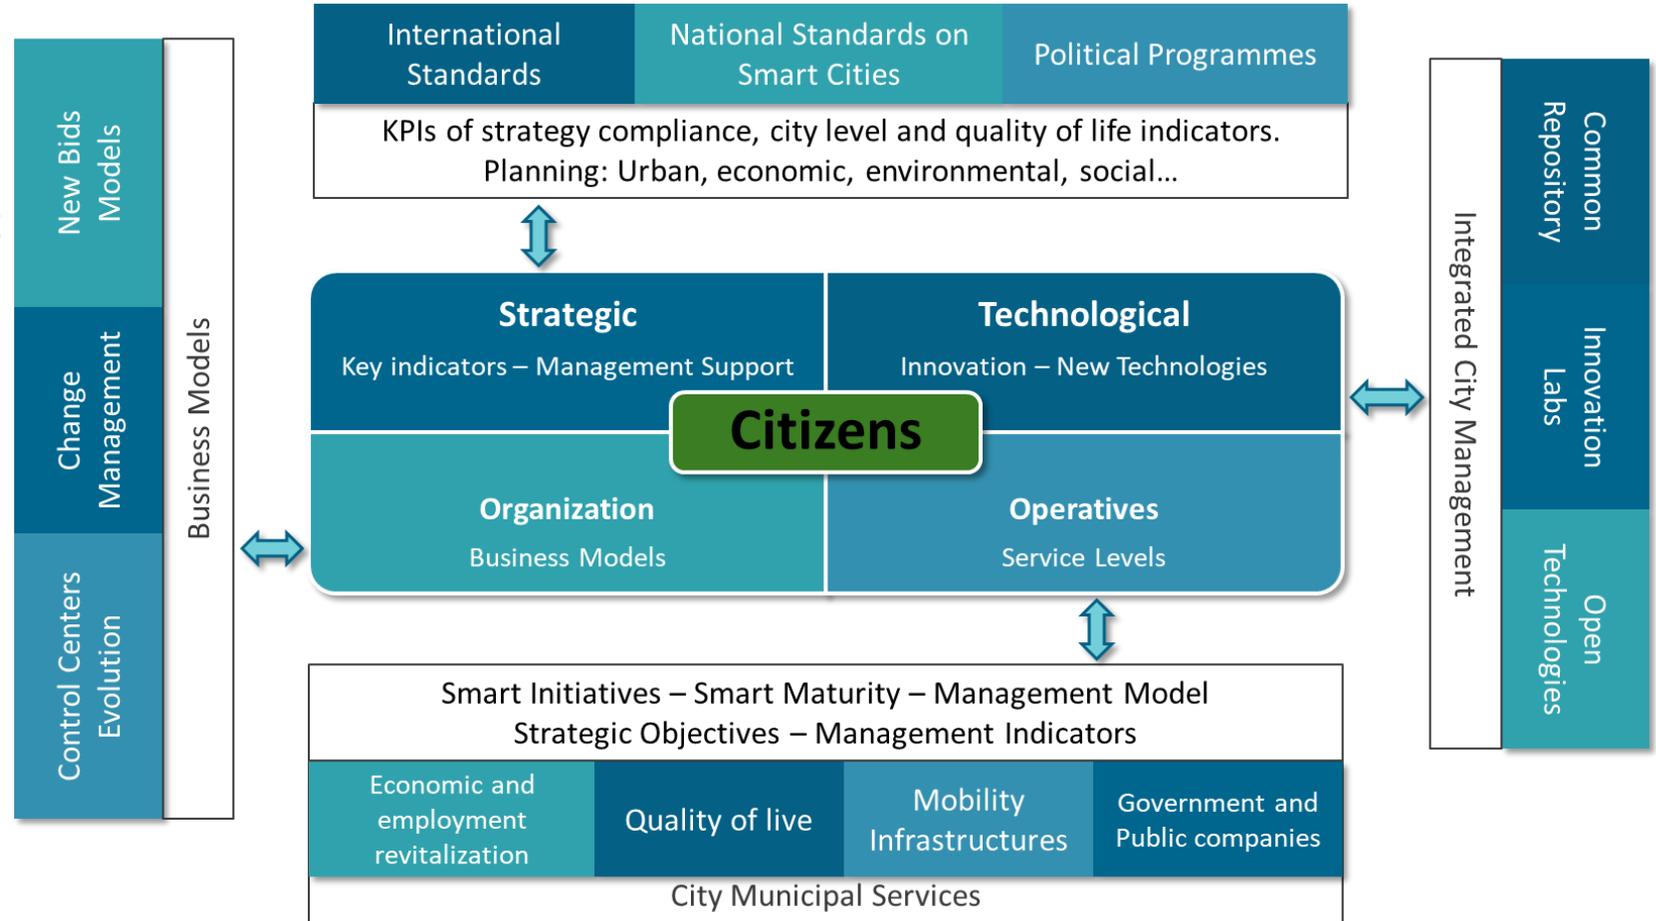

VLCi Platform – the data backbone

- Launched 2014, one of the first FIWARE-compliant platform in Spain.
- Collects data from sensors, municipal systems, external sources.
- Enables service integration, breaks silos and encourages open data.

Data for City Management

- IoT Projects
- City GIS

Hosted by: Holistic view = location + time + service metrics

Valencia's Smart City actuation areas

COMMITMENT TO STANDARDS

DIGITAL TRANSFORMATION OF SERVICES

- Platform Integration
- Smart clauses in public contracts.

CONNECTIVITY

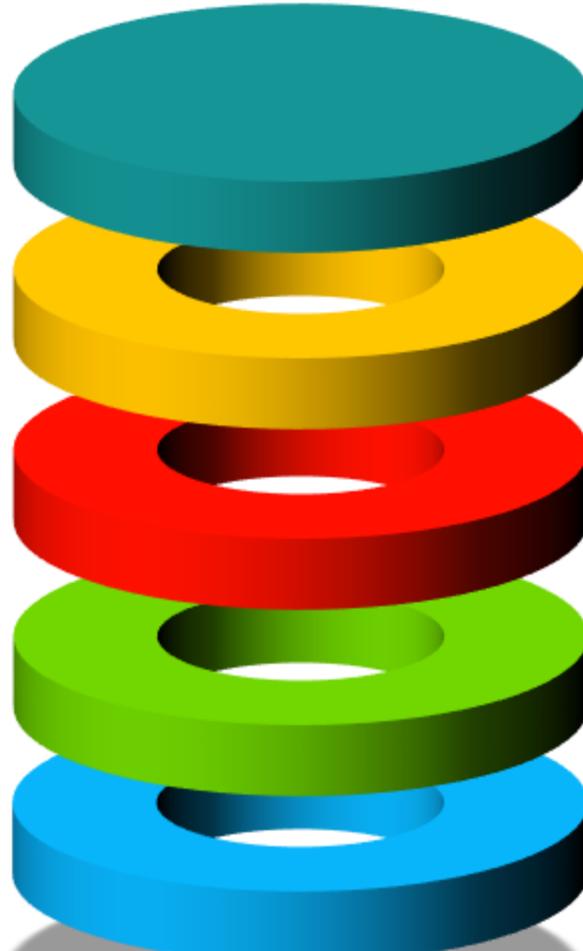

- Connectivity Strategy
- IoT and 5G deployment

Hosted by:

Co-organized by:

INNOVATION ECOSYSTEM

SMART SOLUTIONS

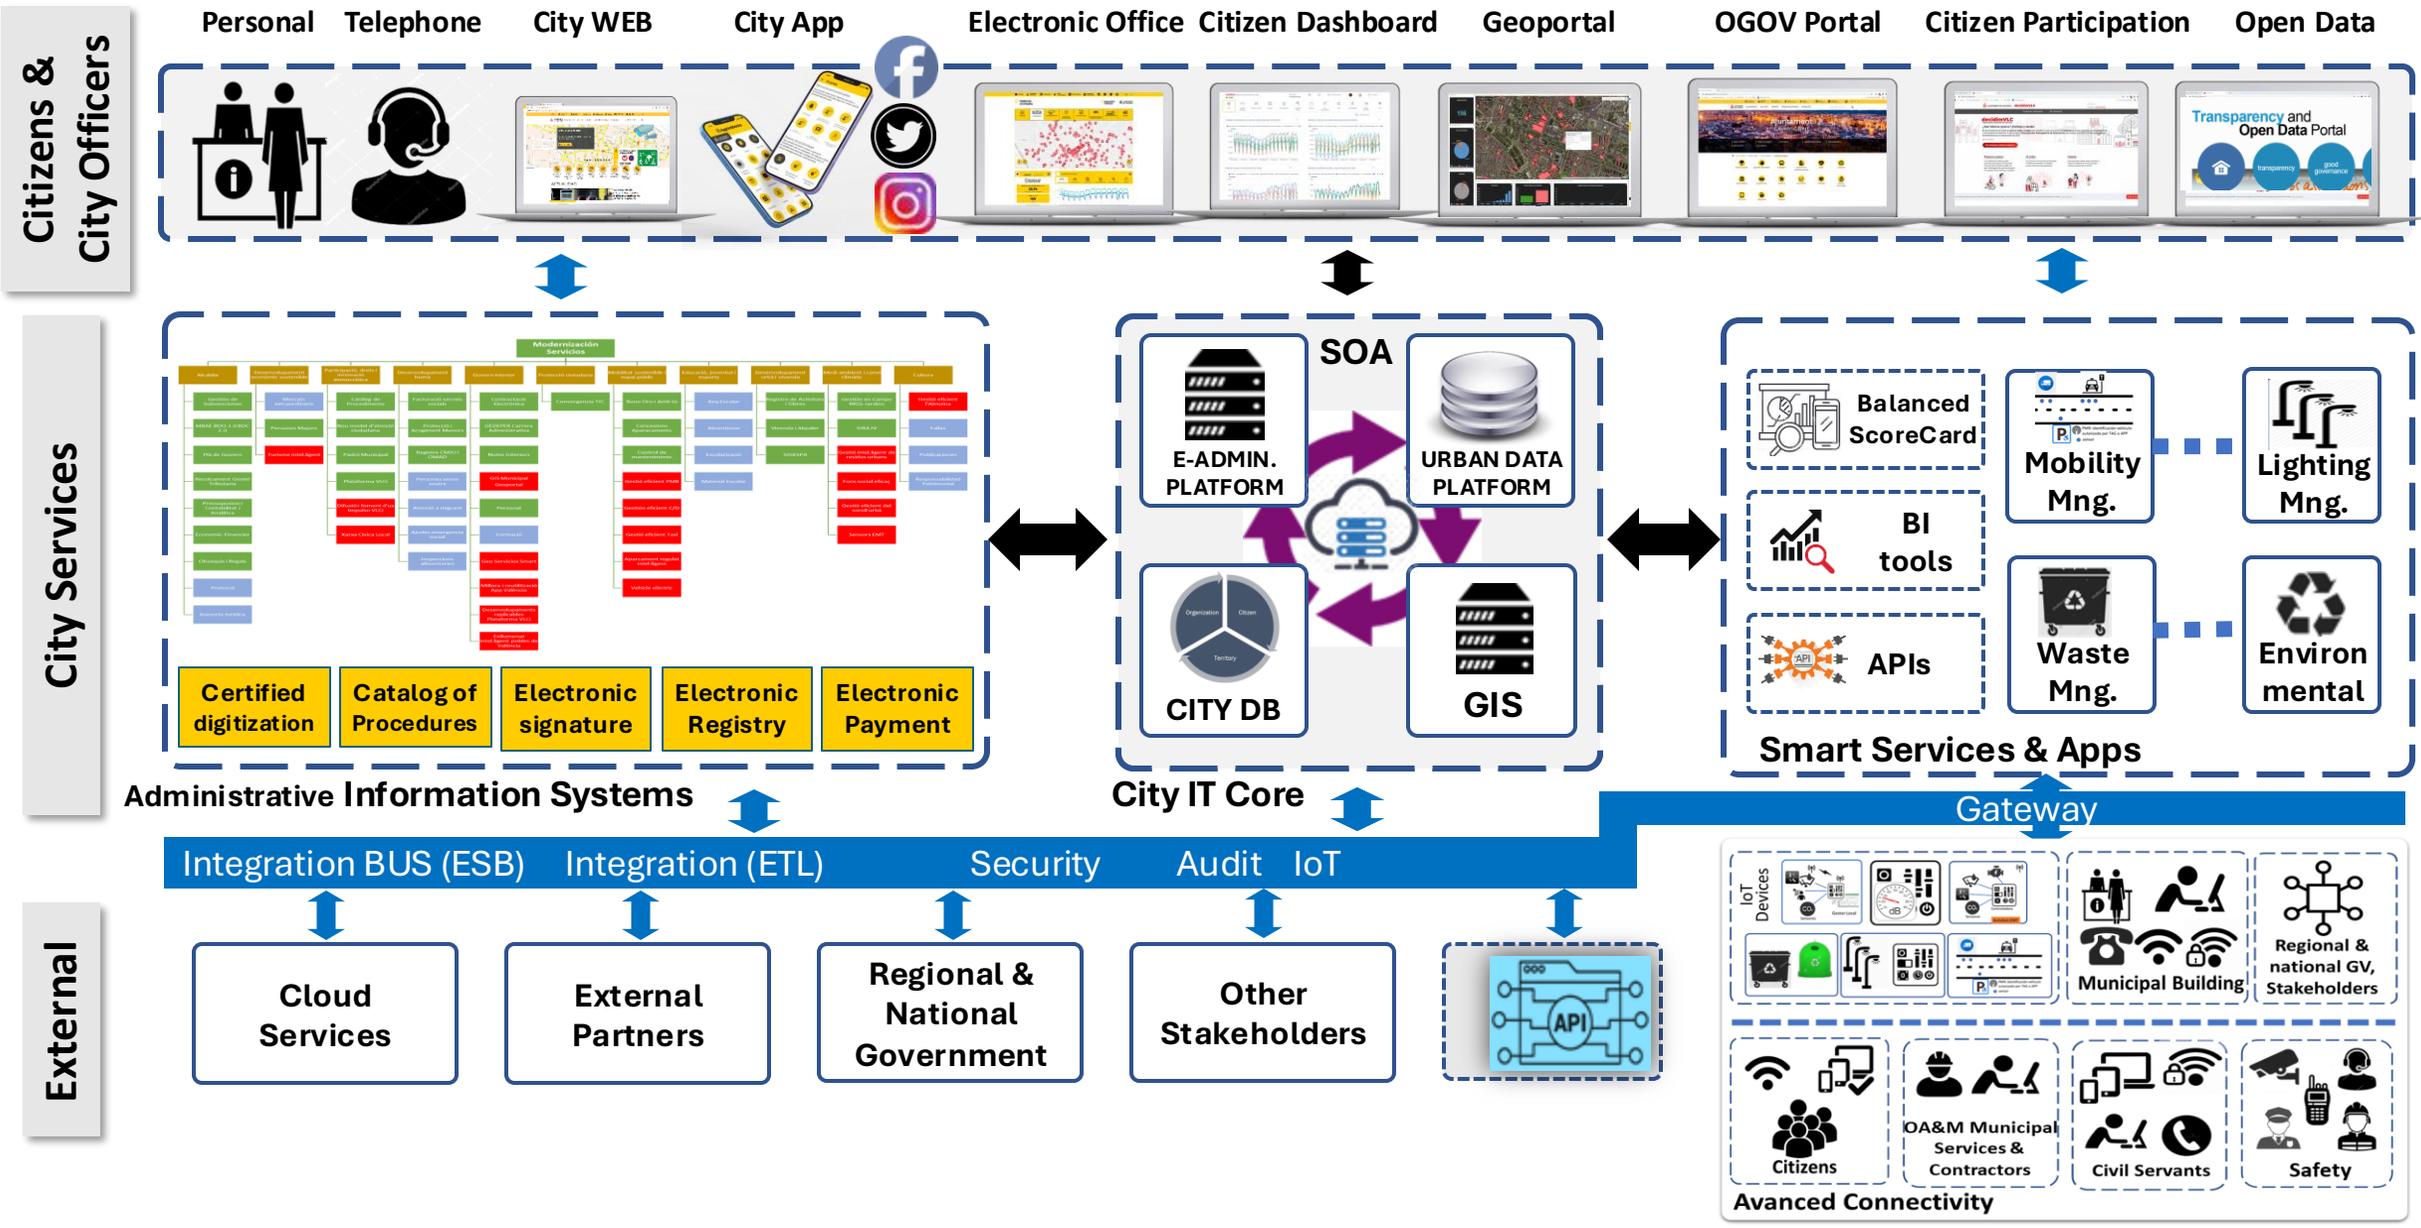

- Dashboards:
- Citizenship - City
- Specific

ENABLING COMPONENTS

- Urban Platform
- GIS - Geoportal
- Open Data Portal
- City App

VALÈNCIA SMART CITY > SMART ICT Ecosystem

Valencia's Smart City Dashboards

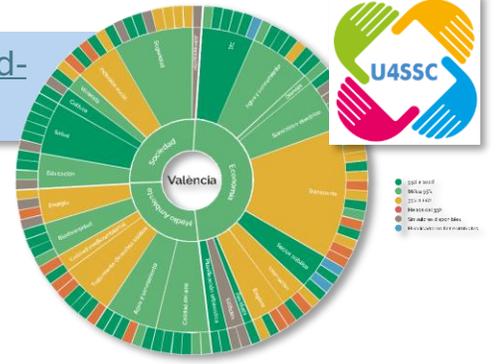

- External view of Valencia
- International Standard Indicators
- Static information / Smart areas.

- Internal – external use
- Operational Management Dashboards
- Economic Management (PMP, GACO, RA...)

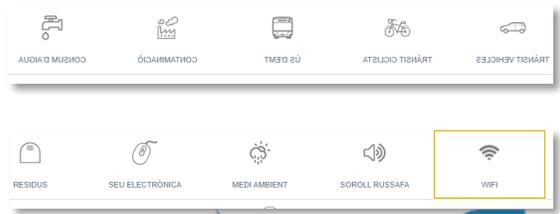

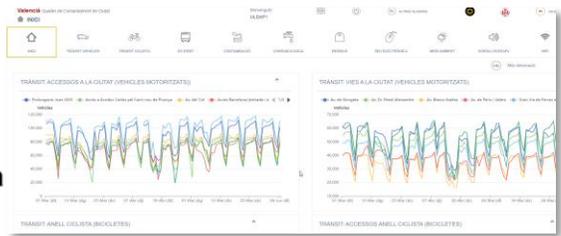

- Internal and external use
- Report Charts
- Information by Area, Delegation, Serv.

- Internal and external use
- Report Charts
- Information by areas of interest

Moving freely, sustainably

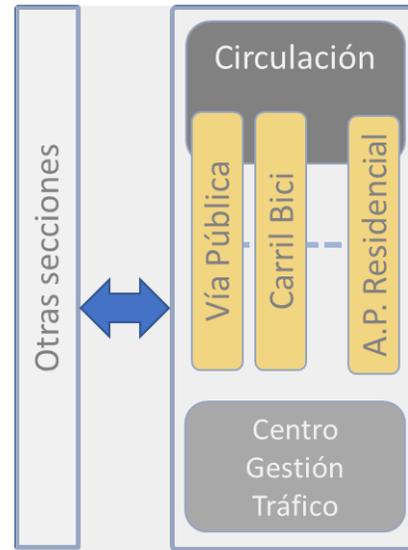

ELECTRIC VEHICLE CHARGING SYSTEM

MUNICIPAL PARKING MANAGEMENT SYSTEM + ORA (SMGE+SGORA)

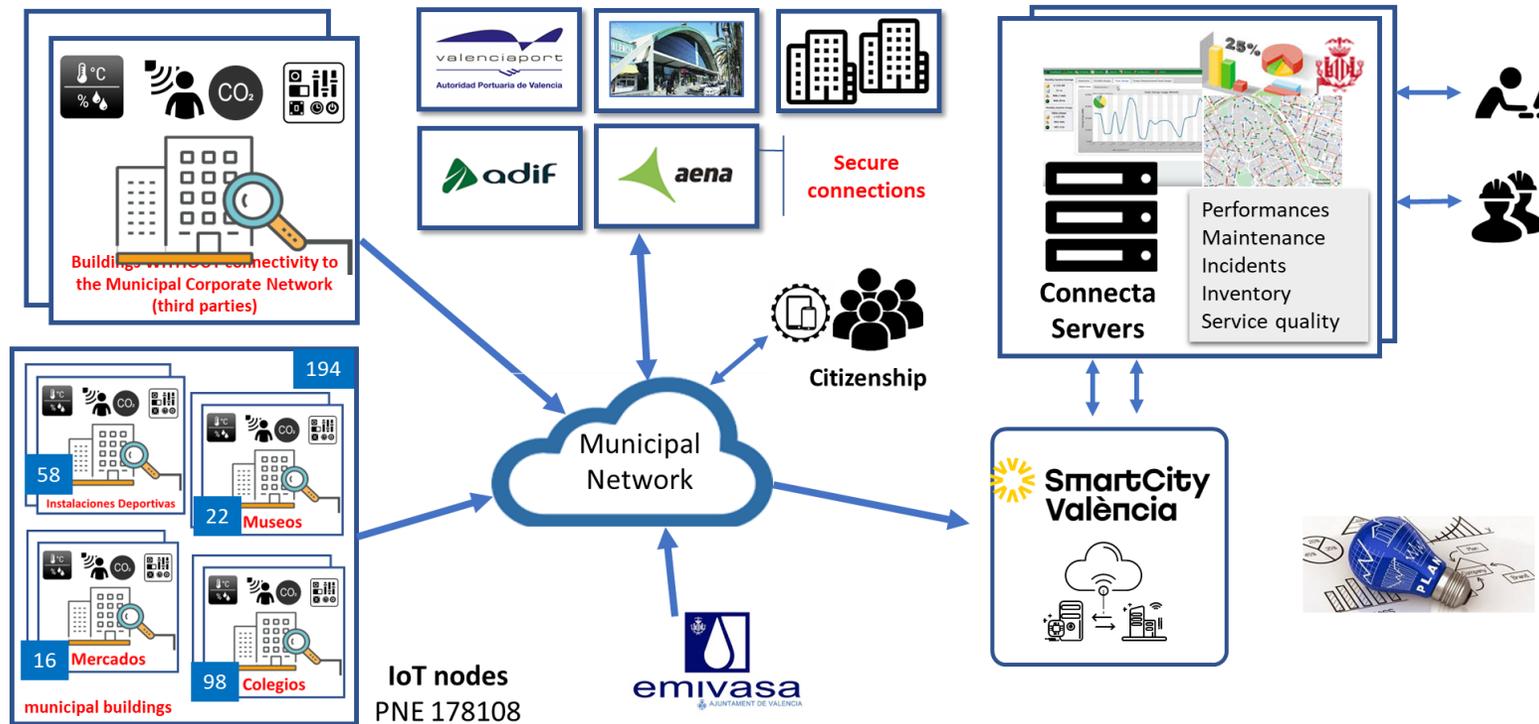

EFFICIENT PMR MANAGEMENT – L/U- TAXI

Movilidad Sostenible

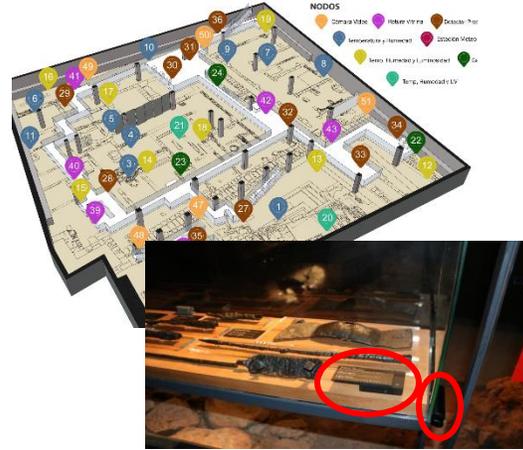

Buildings that think, a starting point for the Valencia Citiverse

- 194 municipal buildings to be made smart.
- Focus on human-centric services: open data, participation.

Almoina

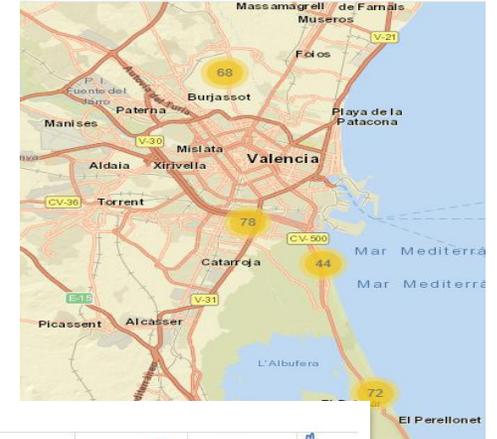

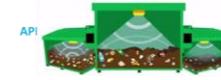

- Heritage surveillance system including video surveillance CCTV
- Temperature, humidity and brightness sensors deployed to monitor status
- Real-time monitoring and historical data available

Solid waste

Settlements in districts. 300 containers
Glass and light containers. Benefits:

- Pickup service optimization
- Avoid overflows
- Improved perception of the city

Air Quality Monitoring in buses

- 44 buses with air quality analyzers
- Real-time monitoring of internal and external air quality (CO, NO2, O3...)

Hosted by:

Efficient use of parking

Reduced mobility, loading and unloading and taxi stops

- 1060 parking spaces
- Real-time occupancy tracking
- Guarantee the correct use of reduced mobility points

Co-organized by:

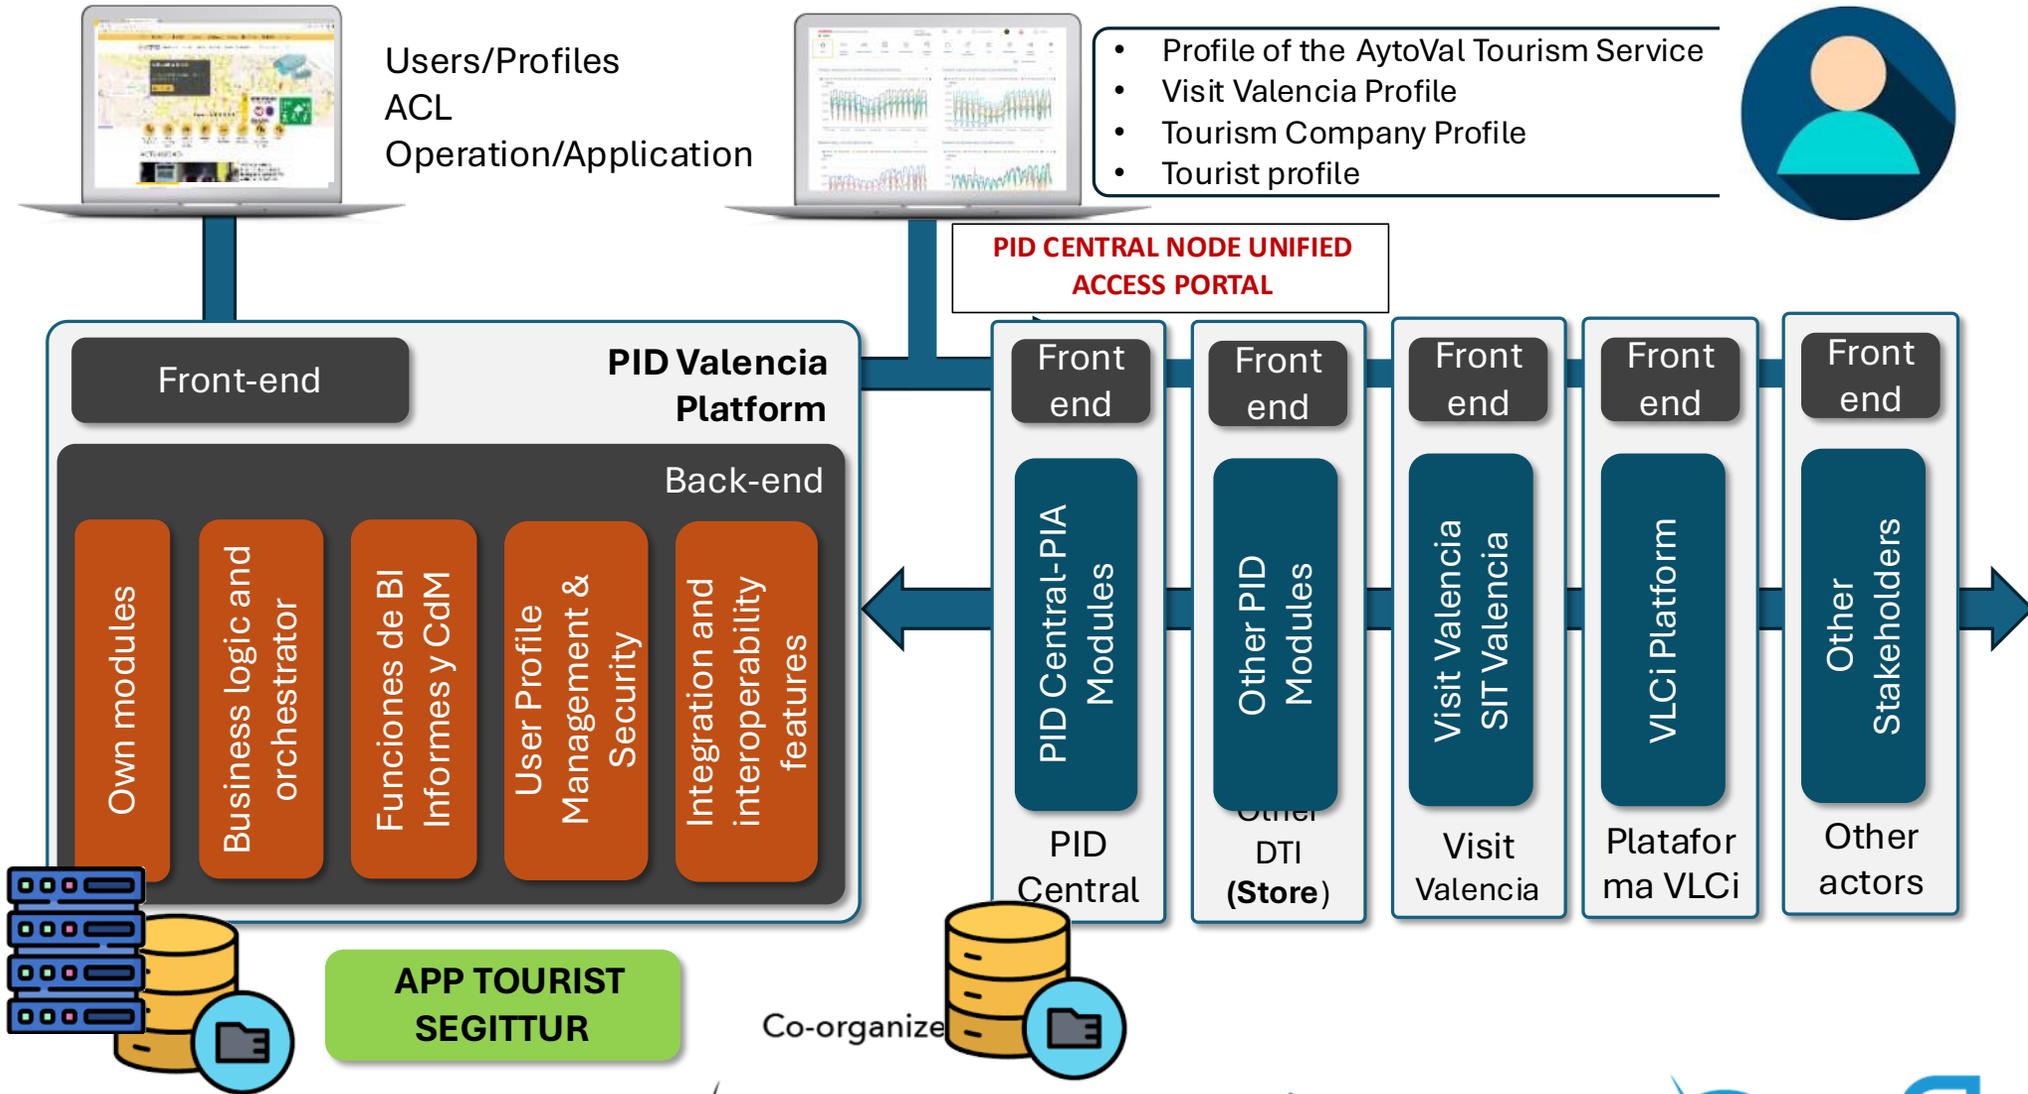

Valencia Smart Destinations Platform

- More than 90,000 València Tourist Cards
- Agility and ease for the tourist,
- Integration into the VLCi platform
- Smart Routes
- Sustainability

Hosted by:

Traffic and environmental monitoring

Dashboard ENVIRONMENT & Valencia-al-minut

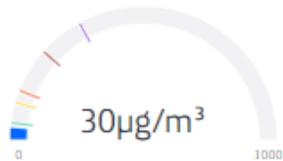

- It unifies the city's environmental information in a single place: Air Quality, Noise, Weather Stations, etc.
- 23 integrated stations with data updated every few minutes.
- Access to historical data for each station.
- Advanced analysis of the impact of some parameters on others. Ex: Impact of rain and temperature on air pollution

WEBSITE Valencia-al-minut

- All relevant city information at glance

How to evolve to a Citiverse Ecosystem?

Hosted by:

Co-organized by:

Ecosystem view: physical + digital + human infrastructures.

Key features: interoperability, real-time responsiveness, citizen-centric design, scalability.

How Valencia is making the transition.

physical + digital + human infrastructures fully integrated, interoperable, adaptive, and citizen-centred.

What we've learned (and still must address)

Integration complexity: organisational, technical, cultural.

Technology is enabler, but governance and participation are vital.

Scalability from pilots to city-wide operations.

Hosted by:

Looking ahead to 2030 and beyond

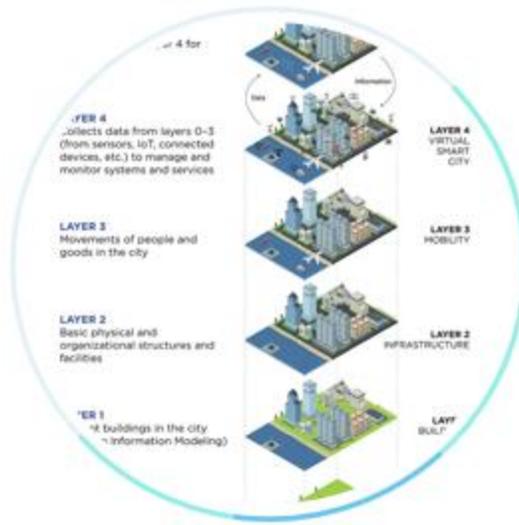

Valencia is already committed with Citiverse

We are deeply committed to the digital transformation of our city.

A leap into the Citiverse is necessary, but with a clear strategy and time

Need to work together

Shift to Citiverse offers better services, sustainability, inclusivity

Urban planning, Tourism, Net-zero emissions, green mobility, intelligent energy & water, citizen-first services.

Valencia aims to export its model, build around digital twin and AI-based simulations.

The cities of the future will face new challenges

The transition to the Citiverse is essential to proactively address the current and future needs of our citizens.

Developing a strategic framework that embraces the new paradigms of disruptive technologies represents the first step in this transformative journey.
