

Country Office	Project
Colombia	<p>From local to global level: immersive traveling and virtual reality</p> <p>The innovation uses 360° interactive virtual reality (VR) videos. These immersive videos are part of a strategy to enhance the visibility of youth initiatives in Colombia's Pacific region, bringing local realities to a wider audience and creating investment opportunities. This approach aligns with the NEXUS framework, offering a means to connect marginalized populations, act as accountability tools, and present an eco-friendly alternative to field visits. It aims to narrow the gap between disparate regions and audiences, elevate youth voices, and position them as change-makers, thus supporting UNFPA's transformative goals and reducing the digital divide. This initiative represents a step towards building an innovative ecosystem for sustainable and impactful partnerships.</p>
Timor Leste	<p>Using Virtual Reality technology to capacitate medical personnel</p> <p>In Timor Leste, the UNFPA Country Office piloted an innovative application of virtual reality technology to transform medical training, particularly in the critical areas of emergency obstetric and newborn care (EMONC).</p> <p>By utilizing virtual reality goggles, doctors and midwives were able to carry out pilots of realistic simulations in managing complex EMONC cases.</p>
Honduras	<p>Bus of Dreams</p> <p>In Honduras, the "Bus of Dreams" involves a specially equipped bus that travels across the country, bringing with it a suite of virtual reality experiences designed to engage and educate its young audience on the critical subject of pregnancy prevention.</p> <p>By leveraging the immersive power of virtual reality, the Bus of Dreams goes beyond traditional educational methods, offering interactive and compelling simulations that allow participants to envision the consequences of their choices and understand the importance of responsible decision-making.</p> <p>The project targets regions where access to comprehensive sexual education may be limited, aiming to fill critical knowledge gaps and empower young individuals with the information they need to make informed choices about their reproductive health.</p>
UNFPA Non-	The " Stronger Together: 8 Billion " NFT collection by UNFPA, created

<p>Fungible Token (NFT) Collection</p>	<p>in collaboration with award-winning artist Cecilie Waagner Falkenstrøm, is an innovative initiative harnessing blockchain, AI and art to celebrate the world reaching a population of 8 billion.</p> <p>This unique collection, composed of 800 digital images that evolve to reflect the dynamism of human populations, was developed using an AI algorithm trained on UNFPA's extensive digital photo archive. The Collection highlights the individual uniqueness and collective strength of humanity, with each artwork symbolizing the infinite possibilities presented by a world of 8 billion people.</p> <p>By directly supporting UNFPA's critical efforts in maternal health, sexual and reproductive health, and the prevention of gender-based violence, the initiative underscores the power of innovative technology and art in driving social change and fundraising for important causes</p> <p>https://www.unfpa.org/8billion/NFT-collection</p>
